

SHARIKI

Venture-Building Programme

Building Businesses. Together.

About Shariki

Shariki is a venture-building initiative of Selfless Solutions that works alongside promising entrepreneurs in Tanzania to strengthen businesses, create jobs, and solve meaningful problems in their communities.

The name “Shariki” is inspired by the Swahili word shiriki, meaning “to participate” or “to take part.” It reflects our commitment to partnership, participation, and practical collaboration.

We work as part of the entrepreneur’s team to address the most important business challenges and support meaningful growth.

How Shariki Supports You

Three months of free, tailored, hands-on support focused on your most important business needs.

This may include strengthening operations, improving financial management, accessing new markets, building partnerships, or preparing for investment.

What We Bring

- Hands-on support from a dedicated Growth Associate who works as part of your team.
- Strategic guidance from experienced consultants.
- Practical help to remove bottlenecks and unlock growth.
- Connections to investors, mentors, and valuable networks.

We listen, learn, and work with you where support is needed.

Our Approach

Shariki is developing its first venture-building pilot in Tanzania. We begin by meeting entrepreneurs and understanding their businesses.

- 01 Discover:** We learn about the business, its products or services, customers, ambitions, and the problems it is solving.
- 02 Understand:** We examine what is working, what is holding the business back, and where opportunities for growth may exist.
- 03 Select:** We select a small number of businesses where deeper collaboration could create meaningful value.

Building With You

Selected entrepreneurs receive practical support tailored to their business. Areas of work may include:

- Strategy and business models
- Operations and team structure
- Investment readiness
- Financial systems and management
- Partnerships and market access
- Key business bottlenecks

Who Shariki Works With

- Entrepreneurs actively building and operating a business.
- Businesses solving a meaningful problem or meeting a real market need.
- Founders with customer or market traction and ambitions to grow.
- Entrepreneurs open to learning, collaboration, and experimentation.
- Businesses with potential to create wider economic or social value.

We welcome entrepreneurs from different sectors and business models.

Where We Are Going

Our ambition is to help promising Tanzanian entrepreneurs build stronger, more scalable businesses that create jobs, expand opportunities, encourage innovation, and contribute to prosperity in their communities.
